Dear Hiring Manager,

I am writing to apply for the Software Engineer – Mobile position in your company. As a passionate software engineer with more than 2 years of experience with cross platform application development, I believe I can add value to your team and organization which will make a meaningful impact on your products and services. I have always been interested in the development of mobile and web solutions with Flutter and would love to contribute to your exciting projects focused on the Fintech domain, while developing high quality applications with the latest technologies.

My excellent code formatting skills, state management patterns, debugging skills, reusable widget development, nested scroll view development, and platform independent feature development using Flutter, allow me to produce high quality and visually intuitive products with less errors. I always improve and share my technical skills related to cross platform app development using platforms such as developer communities, Medium, LinkedIn, AWS and Google academy learning paths, etc.

As an undergraduate at Sri Lanka Institute of Information Technology, I gained enterprise application development experience through my software engineering internship at IFS R&D Private Limited. I started obtaining Agile development skills from there and have continued practicing them in my professional career so far. During my time working in Inivos Technologies Private Ltd, Tiqri Private Limted, and Nuvay Private Ltd, I helped implement multiple mobile and web solutions with Flutter framework. Energy retail solution, M-Learning apps, and language learning apps are most significant among them. I also received positive feedback for my ability in mentoring new members to ongoing projects, best practices in version controlling, implementing automated integration testing in Flutter projects, and attention to detail. I have also developed and released several other solutions such as fitness schedule management apps, car rental app, and machine learning integrated web apps using Firebase hosting, Play Store, TestFlight, and App Center. I have experience in configuring platform specific features using Podfile, Info.plist and gradle, manifest, etc.

I am grateful that you have taken the time to consider me for the position. Please contact me if you have questions or want to discuss my candidacy further. I am positive, I can provide my experience and skills for your organization to strive for greatness.

With gratitude,

Anuradha Siribaddana.
